

Sundance Theater

The Indie Sundance design is the big brother to our Tribeca Theater style. The Sundance incorporates additional acoustical columns which further smooth out high bass frequencies to improve performance. The Sundance also provides a full front wall acoustical treatment set that enhances and provides a deep front stage presence and improves center channel articulation. We also allow for upgraded fabric options for the Sundance Theater design.

Tribeca Theater

For years now, CDGi has been designing and integrating some of the finest home theaters in the world. In fact, two of the 2010 HGTV Top 10 Theaters were CDGi Theaters. Our engineering team has developed the *Indie* line of theaters to provide an acoustically effective theater at an affordable price. These theaters provide clean lines and flexible design options to bring a real theater experience into your home. All you'll need to add is the family, friends and the popcorn.

Includes

- Acoustic Wall Panels (8)
- BassTraps (2)
- Theater Seating (3)
