

Turquoise™

ECO-FRIENDLY acoustic solutions

Turquoise™ is made from recycled cotton - primarily Blue Jean Denim - to provide the world's first green acoustic panel. The bonded acoustic cotton technology has allowed CDGi to innovate a unique acoustic solution with the environment in mind.

Specs

- Class A-1, ASTM E-84, non-flammable.
- 100% recycled Polyester CinemaScape custom printed fabric.
- Made right here in the United States.
- Durable, high performance acoustical panel made from recycled cotton.

Options

- Available in 1" and 2" thicknesses with panels up to 4' x 8'.
- Available with absorptive or diffusive properties.
- Made to your custom specifications.
- Wide variety of environmentally conscious fabrics to choose from.

LEED ELIGIBLE

Innovation in Design

Turquoise can contribute to innovative design credits that involve a plan to utilize innovative material choices throughout the project.

LEED DESIGN CREDITS

LEED Material & Resources

Turquoise contains over 80% Post-Industrial recycled content.

RECYCLED CONTENT CREDITS

Turquoise utilizes cotton as one of its main material sources.

RAPIDLY RENEWABLE RESOURCES CREDITS

Indoor Environmental Air Quality

Turquoise contains no harmful irritants or chemicals that can pose VOC concerns.

LOW EMITTING MATERIALS CREDITS
